### **Residential Swimming Pool Safety Requirements**

#### **AFFIDAVIT OF COMPLIANCE**

Address: \_\_\_\_\_

Date: \_\_\_\_\_

Section R4501.17.1.1 of the 2017 Florida Building Code – Residential Volume (FBC-R), and Chapter 515, Florida Statutes (F.S.), requires pool barriers to be installed around the entire perimeter of a pool, spa or hot tub. In addition to this executed affidavit, all provisions for the required pool barrier shall be shown on the plans.

I/we acknowledge that a new swimming pool, spa or hot tub will be constructed or installed at the above address, and hereby affirm that one or more of the following methods will be used to meet the requirements of the Section R4501.17.1.1 of the 2017 FBC-R and Chapter 515, F.S.

#### **Please check all applicable methods used to create a 360-degree barrier around pool, spa or hot tub:**

- The pool will be equipped with an approved safety pool cover that complies with ASTM F134691(2003), Standard Performance Specifications for Safety Covers for Swimming Pools, Spas and Hot Tubs.
- A new, continuous barrier, such as a fence, wall or screen enclosure, will be placed completely around the pool perimeter to provide the required 360-degree protection. Identify method(s) below and on site plan or pool layout:
- Four foot or higher perimeter fence (wood, chain link, aluminum, PVC or other).
- Aluminum screen enclosure with self-closing, self-latching door with a latching device that is a minimum of 54 inches above the threshold.
- Child safety barrier meeting Section R4501.17.1.15 of the 2017 FBC-R.  
Other (specify) \_\_\_\_\_
- A combination system such as a perimeter (partial) barrier used in conjunction with a child safety barrier between house and pool meeting Section R4501.17.1.15 of the 2017 FBC-R, window/door alarms meeting UL 2017 and Section R4501.17.1.9 of the 2017 FBC-R, or window alarms with doors meeting self-closing, self-latching requirements of Section R4501.17.1.9 of the 2017 FBC-R. Identify proposed combination below and on site plan or pool layout:

- Screen enclosure with child safety barrier between house and pool.
- Screen enclosure with window & door alarms (or complying doors) at required locations (indicate type of alarm and who is installing).
- Perimeter fence with child safety barrier between house and pool.
- Perimeter fence with window & door alarms (or complying doors) at required locations (indicate type of alarm and who is installing).
- Existing four foot or higher perimeter privacy fence converted (with permit) to pool barrier fence with child safety barrier between house and pool.
- Existing four foot or higher perimeter privacy fence converted (with permit) to pool barrier fence with window & door alarms (or complying doors) at required locations.
- Some or all my neighbor's fence is used as the required barrier. I understand there are additional requirements associated with this option because the barrier is located on adjacent property. A Pool Barrier Agreement is required.
- I understand that not having, and not maintaining, a complete barrier around the perimeter of the pool is a violation of Section R4502.17.1 of the 2017 FBC-R, which may be prosecuted.
- I further understand that filling a pool with water before passing a final electric inspection and final barrier inspection by Westlake Building Department is a violation of Section 109.3.A.6 of the Florida Building Code. The Building Department will consider these violations willful and will commence the appropriate disciplinary actions against those responsible.
